AAR Car Type:	Bridges
Sale Type:	Sale Only
Year(s) Built:	1960's
Cubes:	
Load Cap:	70ton
Length:	55ft
Quantity Avail:	50

Notes:

Expounding Info:

Ray, we have available for sale a group of 55 ft. all steel flat deck flatcars. Cars were built in the late 1960s and have been operating in captive service.

Underframes are structurally sound and are of fish belly construction. They are currently sitting on 70-ton roller bearing trucks of U.S. 4ft 8 $\frac{1}{2}$ in track gauge. 9ft 3in wide have new steel decks with anti skid painted on the steel floors

Attached are several representative photos along with a specification sheet. The flatcars to be offered are similar to non-painted unit in photos with trucks under it. There is a stripped and painted underframe loaded on its deck, which has been prepared for a bridge application.

AAR Car Type: 35 ton G.E.

Sale Type: Sale Only

Quantity Avail: 1

Notes:

Expounding Info:

35 ton General Electric locomotive s/n 32212 built 1955. Its original diesel has been replaced with an NTC 250 Cummins engine and it has Schedule 14EL train air brakes. It is 2 axle rigid frame construction and thus has no trucks. A GE 733 traction motor powers each axle. It is ballasted to 38 tons. Brought into stock at a locomotive shop reconditioned and painted. A 2axle (4wheel) locomotive provides more tractive effort than an 8wheel locomotive with trucks because the weight of the unit is concentrated on half as many contact points between rails and wheels. And the OAL of the GE 35 tonner is about 3 feet less than the GE 45 tonner. Dimensions of 35t GE: 25ft x 9ft 7in x 11ft.

Notes:

Expounding Info:

Cummins 855L4 diesels were reconditioned out-of-body a few years back updated electrically with EMD contactors. Air brakes have been upgraded to the modern Schedule 26. Wheels were turned and have substantial treads. The couplers were repaired to meet AAR standards, roller-bearing trucks with four modern GE 763 traction motors and the preferred model 7GA70A2 gear units.
