AAR Car Type:	Tamping machine
Sale Type:	Sale Only
Quantity Avail:	2

Notes:

Expounding Info:

The Plasser American Corporation 08 32 Unimat 4s is a fully automatic tamping machine. The 08 32 Unimat can be used to tamp, lift and line switches or plain track. The 08 32 Unimat 4s utilizes the proven Plasser technology along with the AGGS computer geometry system to give superb quality track work. The 08 32 Unimat 4S uses a 32 tool split tamping unit system that allows the independent tamping of inside and outside the rail or any combination thereof. The tamping units can also be traversed side to side and telescoped outside the frame, and rotated to allow for the most complete, accurate tamping of a switch. The rail lifting and lining is done with a rail hook and roller clamp assembly. The 08 32 Unimat 4s also has an auxiliary third rail lifting clamp that will allow the lifting of the turnout rail in conjunction with the main lift to eliminate the need for helper jacks to prevent over lifting of the main rail.

Manufacturer/Make TRINITY

Model DOT 117J

Mechanical Designation

Equipment Type Code T178

Cars were shopped for cleaning and adding new interior lining [PPG Novaguard 890]. Ready for immediate service. -

Sample copy of inspection report can be attached. Will consider serious offers to purchase or triple net lease NOVAGUARD 890 coating is a solvent-free, single-coat, novolac phenolic epoxy lining that meets emerging petrochemical industry requirements for the storage of biofuels, including ethanol fuel blends. In addition to holding crude oil at temperatures of up to 194 degrees F, NOVAGUARD 890 coating can be used to store aggressive biofuels, such as gasolines with 5 to 95 percent ethanol. Like NOVAGUARD 840 coating, it has excellent pit-filling characteristics and can be used as a reinforced lining for refurbished tank bottoms.

Built Date 10/01/2014
